TREATMENTS

The Biologique Recherche methodology is based on over thirty-five years of experience using innovative products and meticulous protocols.

The products are formulated with high concentrations of active ingredients derived from natural or biotechnological compounds and are fragrance-free. Skin care is provided following a personal dermocosmetic diagnosis (suitable for both men and women) using a Skin Instant® analysis for each individual.

A close-up, monochromatic blue-toned photograph of a person's face being treated. Two hands are visible, one resting on the forehead and the other on the cheek, suggesting a facial massage or skincare application. The person's eyes are closed, and their head is tilted back slightly. The background is a soft, light blue gradient.
